The Sound Choice for New Hammond Organs

Mondri Classic

Quality: the most important stop! That is the one liner in the Mondri Classic philosophy. The new Content Classic Line is based on a breathtaking concept! A handcrafted cabinet with extensive use of solid wood, a pedalboard out of solid wood as in other Content organs, solid wooden drawstops and high quality keyboards. Both wooden keys on a metal key channel as well as keyboards with keys of solid wood and magnetic tracker action are available as an option.

Quality has been the major issue during the composition of the disposition. Not the number of stops, however the quality of the single stops and when in ensemble are the main topic in the development of this unparalleled instrument. The Mondri Classic features 2 totally different dispositions based on independent sets of samples: a Classical and a French Romantic disposition, both offering a very well balanced individual intonation, selected with utmost care and attention.

Next to the stylish cabinetry, the disposition, the intonation and the sound distribution create an excellent balance between the number of stops and the number of amplifiers and speakers, making this highly appreciated line of organs a standard of comparison!

Mondri Classic 16/20
